

POLYPAVE

FILL POT HOLES, RAIN OR SHINE.

Polypave is a one-of-a-kind asphalt emulsion-based cold mix that is designed to repair pot-holes. The material contains no harmful solvents and is safer for the environment than other conventional cold patch products. Polypave is specially formulated to adhere to both wet and frozen surfaces, and it may be applied during extreme conditions in the winter or summer.

Polypave

- Environmentally friendly; contains no harmful solvents or additives
- May be stockpiled higher than conventional materials and will stay viable for up to one year
- Available year round; may be picked up or delivered to the job site
- Will adhere to both wet and/or frozen surfaces
- May be produced at ambient temperatures at a hot mix plant or at the job site in a portable pug mill
- Technical support provided to ensure proper application
